BreastGuard AI

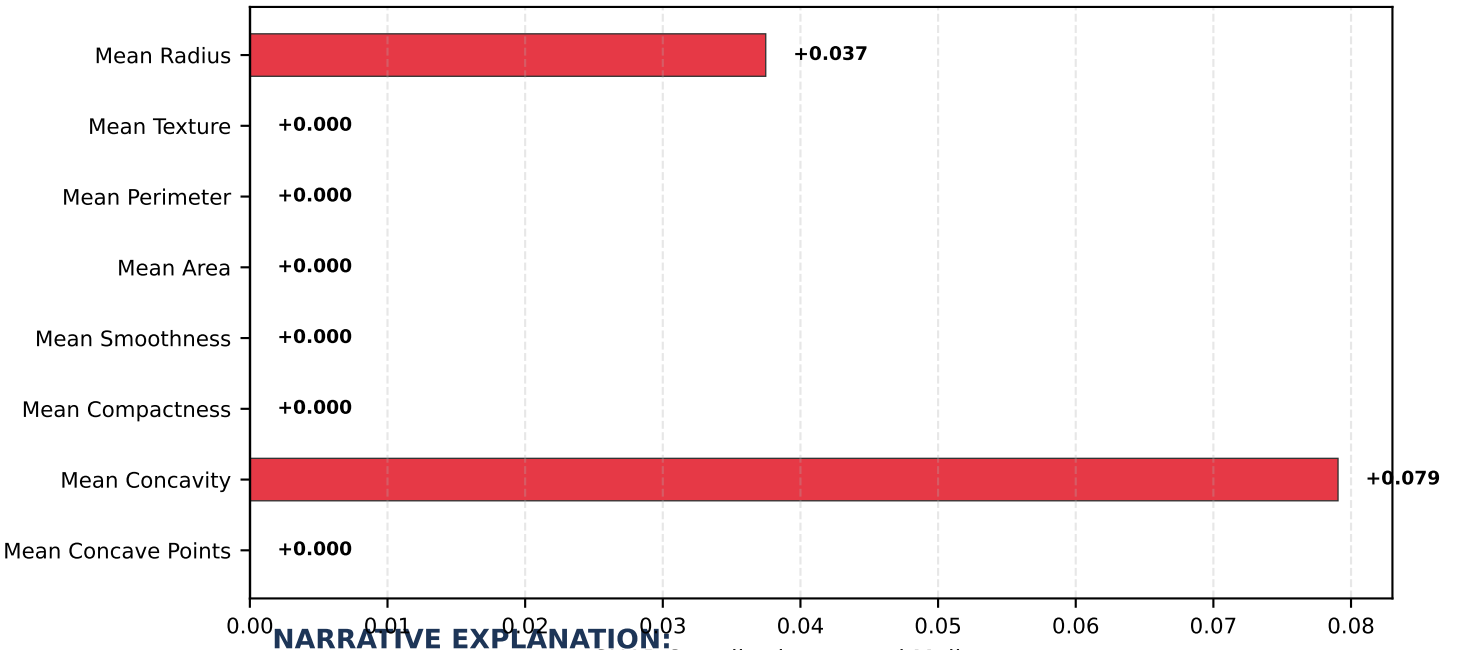
Explainable Breast Cancer Classification & Trustworthy AI Dashboard

Report Date: 2026-11-13 11:30:03
Decision Threshold: 0.37

Model Architecture: Support Vector Machine
Risk Stratification: Critical Risk (>80%)

PREDICTED DIAGNOSIS:
MALIGNANT

P(Malignant): 100.0%
P(Benign): 0.0%



NARRATIVE EXPLANATION:

Model Decision: Classified as Malignant with P(Malignant) = 100.0% (Operating Threshold = 0.37, Population Bas

Features increasing model output toward Malignancy:

- Worst Concave Points (observed value: 0.265) had a positive contribution of +0.096 toward the malignant cl
